WATER RESOURCES BULLETIN 2-12
WATER WELL RECORDS FOR ONTARIO
COUNTIES OF DURHAM, NORTHUMBERLAND AND VICTORIA
1946-1969

INTRODUCTION

This bulletin contains water-well record data for the counties of Durham, Northumberland and Victoria for the period 1946 to 1969. Table 3 lists previous publications in which similar data have been published.

Water-well record information in this bulletin is produced from the print-out of computer-stored data. The pertinent details about the data are explained in the section entitled, "Explanation of Column Headings".

The original water-well records published in this bulletin may be referred to by the public at the office of the Central Region, Ministry of the Environment at:

150 Ferrand Drive
Don Mills, Ontario
Tel: 416-424-3000

Enquiries

Enquiries about this publication should be addressed to:

Acknowledgements

The Ministry of Environment gratefully acknowledges the assistance and service rendered by the water-well drilling and boring contractors who submitted the water-well records. This information provides a basic and unique tool in the assessment of ground-water conditions throughout Ontario.

This bulletin was prepared by staff of the Water Resources Branch who were ably assisted by the staff of the Administrative Services Branch, and the Technical Services Branch.

WATER WELL RECORDS

All water-well records forwarded by contractors are on file at the Regional Offices of the Ministry of the Environment.

A selection of the important information from each record has been compiled in this bulletin, essentially as supplied by the driller. Some terms employed by drillers have been altered to conform to a standard list of geological materials which appears under "Material Abbreviations" in the section that follows.

The pumping-test rates, reported in gallons per minute, are the result of short-term pumping tests. They do not necessarily represent the rates at which the wells could continue to supply water for prolonged periods of pumping. Continuous pumping at the stated rates could have resulted in some of the wells being pumped dry, while others may have been capable of being pumped steadily at much higher rates than those reported during the pumping tests.

In the classification of water use, domestic (DO) includes supplies for private household use; stock (ST) includes supplies for watering and washing livestock; public supply (PS) includes supplies for camping grounds, hospitals, churches, schools and public washrooms; commercial (CO) includes supplies for garages, stores, restaurants, motels, drive-in theatres, and fish hatcheries; industrial (IN) includes supplies for factories and dairies; irrigation (IR) includes supplies for greenhouses, golf courses, market gardens and other crops; municipal (MU) includes wells developed for municipal water systems serving five or more residences.

Licensed Boring and Drilling Contractors 1963-1969

Table 2, page 446 lists the licensed water-well boring and drilling contractors together with the number of wells constructed by each contractor within the counties of Durham, Northumberland and Victoria in each year from 1963 to 1969. the contractors listed may have constructed wells in other areas during this period.

EXPLANATION OF COLUMN HEADINGS

MUNICIPALITY	<p>Municipal names, as used under the county and township system, are used in this bulletin. Changes in municipalities are indicated by having the old names appear in brackets after the current names, e.g. Port Hope (Hope) means that wells listed under this heading are in the area which is now in the Town of Port Hope but was formerly part of the Township of Hope. In such cases, the survey descriptions given are for the former municipality, i.e. the Township of Hope.</p>
WELL NO.	<p>(Well Number) This is a unique number within the county or district under which it is listed; combined with the county or district number, it is unique within the province.</p>
UTM EASTING NORTHING	<p>(Universal Transverse Mercator Co-ordinates in Metres) This location system makes use of a square grid, 1,000 metres x 1,000 metres, which is superimposed on maps of the National Topographic System. The vertical grid lines are called Eastings and the horizontal lines Northings.</p> <p>The Easting represents the distance of a well in an easterly direction from a given north-south reference line. The Easting is the upper figure in the column.</p> <p>The Northing represents the distance of a well in a northerly direction from a given east-west reference line. The Northing is the lower figure in the column.</p> <p>The Eastings and Northings allow the plotting of wells on the National Topographical maps directly from the bulletin. Each map contains an explanation on the use of the co-ordinate system.</p> <p>The UTM co-ordinates were calculated after the well locations were plotted on topographic maps, using the locational diagrams submitted by the drillers.</p>

ELEV FEET	(Elevation in Feet) This represents the ground elevation at the well site in feet above mean sea level. The elevations were determined from plotted locations on the National Topographical maps and are therefore related to the accuracy of locations and the scale of the maps.								
DATE	The month and year of well completion are shown in this column.								
DRILLER	The driller's license number is given. Table 2 is a numerical listing of drillers and their addresses.								
CSG DIA INS	(Casing Diameter in Inches) Casing diameters are shown to the nearest inch. Where several sizes of casings are used, the diameter of the upper casing only is given.								
KIND OF WATER	The following abbreviations were used to record the kind of water reported by the driller: <table> <tr> <td>FR</td><td>Fresh</td></tr> <tr> <td>SA</td><td>Salty</td></tr> <tr> <td>SU</td><td>Sulphur</td></tr> <tr> <td>MN</td><td>Mineral</td></tr> </table>	FR	Fresh	SA	Salty	SU	Sulphur	MN	Mineral
FR	Fresh								
SA	Salty								
SU	Sulphur								
MN	Mineral								
WATER FOUND FEET	This is the distance or distances in feet below ground level at which the driller reported the occurrence(s) of water.								
STAT LVL FEET	(Static Level in Feet) This is the distance to the water in feet below ground level when the well is not being pumped. Static levels above ground are not given; the notation FLW, representing a flowing well, is given for this condition.								

PUMP LVL FEET (Pumping Level in Feet) This is the distance to the water in feet below ground level at the end of a pumping test or the start of a recovery test.

TEST RATE GPM (Pumping Test Rate in Imperial Gallons per Minute) This is the rate at which the well was test-pumped. In some cases the stated rate is a recovery rate, or the flow rate of a flowing well.

TEST TIME HR/MIN (Test Time in Hours and Minutes) This is the length of time during which the pumping or recovery test was conducted. Test times of 100 hours or greater are shown as 99 hours 59 minutes.

WATER USE The following abbreviations are used to describe water use:

Domestic	DO
Stock	ST
Irrigation	IR
Industrial	IN
Commercial	CO
Municipal	MU
Public Supply	PS
Cooling or Air Conditioning	CA

OWNER/LOG The name of the original owner of the well is given on the top line. The materials for each formation are described by standard abbreviations. They are listed in predominant order, i.e. the most common material first and other materials after. General colour qualifications are given where pertinent. The following examples illustrate the principle:

msnd grvl	- sand and gravel
grey clay fsnd grvl	- grey clay and fine sand and gravel
brwn grvl csnd	- brown gravel and coarse sand

Material Abbreviations

Unknown	UNKN
Fill	FILL
Top Soil	TPSL
Muck	MUCK
Peat	PEAT
Clay	CLAY
Silt	SILT
Quicksand	QSND
Sand or Medium Sand	MSND
Fine Sand	FSND
Coarse Sand	CSND
Gravel	GRVL

Green	GRN
Yellow	YLLW
Brown	BRWN
Red	RED
Black	BLCK

DEPTHS IN
FEET TO WHICH
FORMATIONS
EXTEND

Each formation is followed by a number which indicates the distance to the bottom of the formation. The last number generally indicates the total depth of the well.

Survey Abbreviations

The following abbreviations are used to designate tracts of land and surveys:

<u>Abbreviation</u>	<u>Land Area</u>	<u>Municipality</u>
